Education

Ateneo de Zamboanga University — Zamboanga City, Philippines
Bachelor of Science in Computer Science — *Aug 2022 — Present*

- Concentrations: Software Engineering, Web Development, Cloud Computing, and Systems Architecture
- Coursework: Software Engineering, OOP, Data Structures and Algorithms, Machine Learning, Database Systems

Experience

Software Engineer | *Next.js, TypeScript, GraphQL, QA* — Jul 2026 — Present
Ngnair Payments — *Wyoming, USA*

- Worked closely with the **lead software engineer** on frontend development and QA for a payment startup, contributing **Next.js/TypeScript** interfaces and **GraphQL** integrations across **microservices and microfrontends**.
- Tested **merchant onboarding, role-based navigation, and review workflows** across Partner and Location applications; reproduced issues and verified fixes through regression testing.
- Traced UI behavior through **GraphQL and NestJS/Fastify service contracts**; checked role access and integration behavior in **Docker and Cloudflare/CapRover** staging environments, and documented results in **Linear**.

Solutions Developer Intern | *C#, ASP.NET Core, Python, SQLite* — Jun 2026 — Jul 2026
Capytech E-Learning Solutions — *Zamboanga City, Philippines*

- Built a **Photino.NET SCORM QA sandbox** with **C#/ASP.NET Core** APIs for package inspection, playback simulation, and **SQLite telemetry**, supporting repeatable local content checks.
- Developed an offline **Python/FastAPI retrieval service** and customized **Moodle** interfaces with JavaScript and CSS for corporate e-learning clients.

Full Stack Developer | *JavaScript, TypeScript, REST APIs* — Jun 6, 2025 — Jul 12, 2026
JP Consulting & Services LLC — *Remote, UAE | 1 year 1 month*

- Built and maintained full-stack JavaScript, TypeScript, and Node.js applications for Australian clients under senior developer guidance.
- Contributed responsive interfaces, **REST API integrations**, database work, debugging, and testing while working remotely for the UAE-based company.

Projects

Suntastic Solar IMS | *Next.js, ASP.NET Core, EF Core, CockroachDB* — Jun 2026 — Present

- Built **Next.js/React Admin and Clerk dashboards for Suntastic ZC**, bringing solar inventory, sales, supplier receipts, quotations, and customer collections into one **ASP.NET Core/EF Core** system.
- Implemented **branch-scoped access, transactional stock movements, idempotent commands**, version checks, and append-only financial ledgers to preserve audit history.
- Added cursor pagination, **TanStack Query** invalidation, and **QuestPDF** reports; integrated **CockroachDB, Cloud Run, a Cloudflare Workers BFF, and private R2 media** with GitHub Actions delivery.

Easy Queue | *Next.js, NestJS, Prisma, PostgreSQL, Redis, BullMQ* — In development

- Built a mobile-first **Next.js** interface for office selection, live tickets, staff queue controls, assisted registration, and public displays, integrated with a **NestJS/Prisma API**.
- Implemented **PostgreSQL priority/FIFO transactions** and ticket deadlines; used a transactional outbox, **Redis/BullMQ** workers, and authenticated SSE for post-commit updates.

Social Development Unit | *React, MUI, TanStack Query, Express, Supabase* — Sep 2025 — Dec 2025

- Built a **React/MUI reporting platform supporting six offices**, with office-specific workflows and a consolidated Unit Director dashboard backed by **Express and Supabase PostgreSQL**.
- Added **Axios JWT refresh-and-retry handling**, **TanStack Query** caching, and structured activity forms; generated monthly PDFs with **@react-pdf/renderer** for budgets, SDGs, and strategic-goal reporting.

Leo Rent A Car | *React, Vite, Tailwind CSS, Resend, Vercel* — Jul 2025 — Aug 2025

- Built a responsive **React/Vite/Tailwind CSS** fleet and services website with route metadata and lazy-loaded images; integrated **Resend through a Vercel function** for inquiries and customer acknowledgments.
